zero-in™ **797-A** POWDERED INSECTICIDE

- Long-lasting lethal action
- Powder formula
- Safe for mammals

CARE FOR WORK ENVIRONMENTS®

zero in™ 797-A POWDERED INSECTICIDE

LONG-LASTING LETHAL ACTION

Residual powder sticks to insects' sticky bodies, quickly killing them. Coated insects transfer Zero In 797-A to other insects through close body contact. The residual powder remains insecticidal for up to six months.

DUAL ACTION KILL

Zero In 797-A powder adheres to the insects body and absorbs its waxy coating to effectively dehydrate the insect. In addition, the all-natural pyrethrins act as a nerve toxin to quickly kill the insects.

EFFECTIVE AGAINST

Zero In 797-A kills ants, cockroaches, bedbugs, fleas, lice, ticks, pillbugs, millipedes, drywood termites, centipedes, earwigs, sowbugs, ground beetles and scorpions.

WHERE TO USE

The powder is great for use in restaurants, stores, hotels, offices, plants, warehouses, truck trailers, railroad cars, bakeries, beverage plants, supermarkets, meat & poultry processing plants, motels, hospitals, schools and theaters.

DIRECTIONS FOR USE:

It is a violation of federal law to use this product in a manner inconsistent with its labeling.

DRYWOOD TERMITES: To protect against entrance, using an electric or hand-operated rotary duster, distribute product through an entry, e.g. crawl hold into attic and crawl space of building, at a rate of 1 pound per 1,000 square feet of floor area. All vents and blowers on the windward side should be closed. All wood surfaces should be covered. In case of localized infestations, probe to locate galleries and drill holes to inject product into the galleries. If reasonably heavy infestation has already developed, fumigation should be employed.

FLEAS: Surface of kennels should be dusted at the rate of one ounce per 50 square feet. Heavily-infested lawns, basements, and crawl spaces should be dusted at the rate of 16 ounces per 1,000 feet. Repeat as necessary.

SOWBUGS, PILLBUGS, GROUND BEETLES, EARWIGS, MILLIPEDES, CENTIPEDES AND SCORPIONS: Apply around doors and windows and other places where these pests may enter premises. Treat baseboards, storage areas and other locations where these pests are found.

FOR ROACH CONTROL IN SEWERS: Remove manhole cover and replace with a disk of plywood board to receive the flexible hose from the truck-mounted ventilating equipment. Pour approximately 6 ounces of Zero In 797-A into ventilator-blower attached to manhole of infested sewer line. Clouds of Zero In 797-A will then spread over hundreds of feet of roach-infested sewer lines. When treating sewers, one manhole per 200 feet of line should be treated. Continue application through the next two manholes beyond visible evidence of roach infestation. This treatment is highly effective for the control of American and Oriental roach infestations.

BEDBUG CONTROL: Dust Zero In 797-A into all joints, channels and hollows of bed. Mattress, adjoining furniture and all cracks in the room should also be treated.

WARNING: APPLICATIONS OF THIS PRODUCT IN THE FOOD AREAS OF FOOD HANDLING ESTABLISHMENTS, OTHER THAN AS A CRACK AND CREVICE TREATMENT, ARE NOT PERMITTED.

Please review label and SDS for all product directions, precautions and first aid information.

TECHNICAL DATA:

APPEARANCE: fluffy white powder

ODOR: slight

DENSITY: 8.1 ± 0.5 lbs./cu. ft.

ACTIVE INGREDIENTS:

Pyrethrins: 1.00%

Piperonyl Butoxide: 10.00%

Amorphous Silica Gel: 40.00%

FORMULATION TYPE: residual insecticide

KNOCKDOWN: fast

AMERICAN/ORIENTAL ROACH INFESTATION: highly effective

BEDBUG CONTROL: yes

AUTHORIZATION: Environmental Protection Agency

EPA Regulation Number: 432-992-70799

PACKAGING

122928

2.82 oz. container/CS12
